

FRONTIERS IN REPRODUCTIVE EPIGENETICS SYMPOSIUM

EPIGENETICS OF MATERNAL AND PATERNAL EFFECTS

MAY 12, 2017 | GRAND RAPIDS, MICH.

The inaugural *Frontiers in Reproductive Epigenetics* symposium will focus on parental effects, when the genotype of the mother or father rather than the genotype of the individual determines phenotype. These phenomena are now investigated extensively at the molecular level and the results often point to specific epigenetic modifiers affecting the egg or sperm. Epigenetic disturbances in the gametes can have long-lasting effects on the offspring and even on future generations.

REGISTRATION DATES

Early registration

January 31–February 27

General registration

February 28–May 3

Poster abstract deadline

March 31

ORGANIZING COMMITTEE

Ronald L. Chandler, Ph.D.

Asgi T. Fazleabas, Ph.D.

Peter A. Jones, Ph.D., D.Sc.

Richard E. Leach, M.D., FACOG, FACS

Gerd P. Pfeifer, Ph.D.

Piroska E. Szabó, Ph.D.

LOCATION

Van Andel Research Institute

333 Bostwick Ave. NE

Grand Rapids, MI 49503

USA
