

Little embryos do make big decisions

Symposium to celebrate the career of Professor Tom Fleming FRCOG
on the occasion of his retirement

Friday 7 July 2017, St Mary's Stadium, Southampton, UK

Invitation

On behalf of the local organizing committee, it is my great pleasure to invite you to a day symposium 'Little embryos do make big decisions'. The Symposium is supported by the Society for Reproduction and Fertility (SRF), and aims to bring together researchers to exchange and share their interests, experiences and research findings about how early life events influence embryo development and adult health. The Symposium will provide plenary lectures and poster presentations.

The Symposium is held to honour Tom Fleming FRCOG, Professor of Developmental Biology, who is retiring in 2017. Tom has, over several years, conducted research at the University of Southampton into Embryo Environment and Developmental Potential and Health, as well as Mechanisms of Early Mammalian Development. He is also a long-standing member of the SRF.

The symposium will be held at St Mary's Stadium in Southampton on 7 July 2017. Registration and abstract submission will open shortly. Please put the date in your diary.
