

UNIVERSITY OF LEEDS

Society for Reproduction and Fertility Travel Grant Award 2017

Recipient: Chutima Topipat

Position: PhD student

I would like to express my sincere gratitude to the SRF committee for travel grant awarding 2017. This has given me the opportunity to join and have my poster presentation in the European Society of Human Reproduction and Embryology in Geneva. The congress was huge in terms of varieties of educational subjects both clinical and basic sciences. Moreover, the exhibition was also massive, broad technologies and availabilities of new product/new generation equipment presentation. The conference operated on the new media and application, which was very convenient for the contributor. However, I was kind of missing some old fashion booklets. Most of speakers gave wonderful talks in depth of their interesting works. This was enhancing and shining me to pursue my new career path. And foreseeing the future, I would try to make my translational research happen. My abstract was selected for a e-poster presentation in the theme of female fertility. However, the e-poster was convenient for organizer but in participant's perspective was not much appreciative due to high ratio of participants and monitors.

The Geneva venue was wonderful with cultural and magnificent scenery. However, cost of living was very expensive both foods and accommodation. Without the support from the SRF grant, it would be difficult to join such a big meeting and to have unforgettable experience with some international collaboration. Once again, I sincerely thank for the SRF committee that provides the wonderful grant to support different groups of members. This is such a fantastic society for all researchers in Reproduction.
