

A definitive guide for highly successful and low risk PGD

Pre-implantation Genetic Diagnosis: current practice and beyond

9 – 10 November 2018
Guy's Hospital, London, UK

Hear from a centre with 20+ years experience in Preimplantation Genetic Diagnosis (PGD), which is one of the most successful in Europe with **more than 800 babies born free from genetic diseases** following PGD.

Includes talks from Clinical Genetics, Reproductive Medicine, Embryology and Genetics Laboratories to share our multidisciplinary experience, followed by interactive workshops on complex issues.

Early bird savings apply when you book before 7 September 2018.
