Master of Philosophy in Biological Sciences

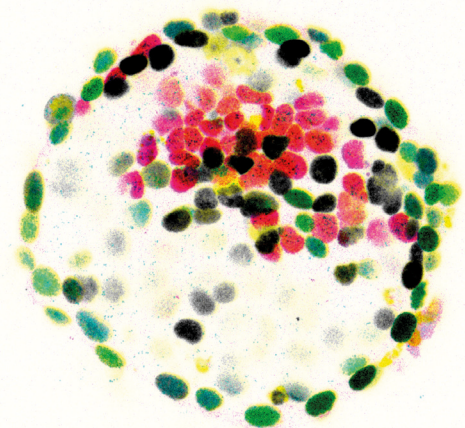

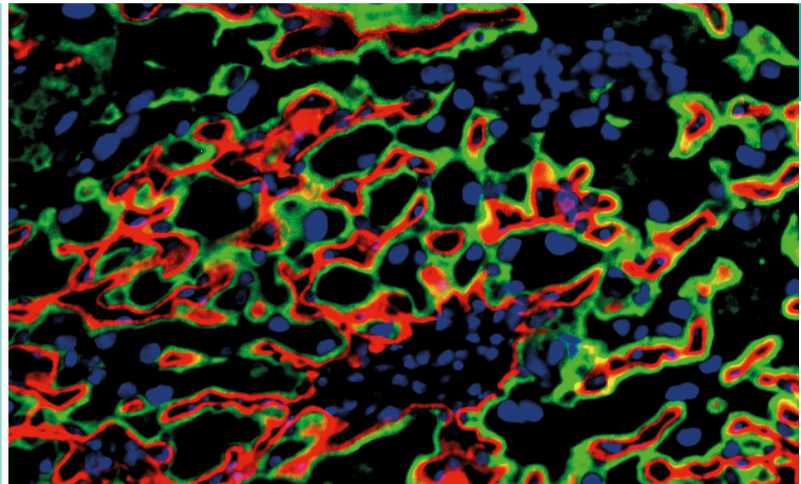

Reproduction and Embryogenesis

Our new **Master of Philosophy degree in Reproduction and Embryogenesis** takes a multi-disciplinary approach to the most urgent challenges in reproduction. The course is **open for applications now** for students wishing to start in October 2024.

The course features taught modules across four interconnected and interdisciplinary thematic modules:

- Gametes and embryogenesis
- Extraembryonic tissues and maternal interfaces
- Fetal development, environmental factors and pregnancy outcome
- Stem cell-derived embryo models

Students will carry out an **8-month research project** where they will work embedded in a research team investigating questions at the cutting-edge of reproduction and embryogenesis research.

MPhil
Reproduction &
Embryogenesis

Applicants wishing to be considered for **scholarships** should submit their application in time for the following deadlines:

Gates scholarship: 11 October 2023

Fee waivers: 20 December 2023

Uni. of Cam. scholarship: 4 January 2024

**CAMBRIDGE
REPRODUCTION**

Course application deadline:
24 April 2024
